Other important notes to consider

Puppies and kittens may not travel to Indonesia on their dam's vaccinations. They must have their first Rabies vaccination administered at 12 weeks of age (3 months) and then start the exporting procedure.

- For your pet's comfort during travel, we encourage you to include a favourite blanket, soft toy, or old T-shirt with your scent which we will place in their travel container
- Chemical and other strong sedatives are NOT ALLOWED.
- Mild herbal remedies such as Rescue, CalmEze, catnip spray or other valerian root extracts are permitted.

Please inform your Petwings consultant of any brachycephalic (snub nose) pets traveling as certain airline, routing and seasonal restrictions may apply.

The RNATT will be redone upon arrival in quarantine. The quarantine period is 3 – 7 days and must be pre-arranged prior to travel to Indonesia (we can advise you).

Pitbull breed and their crosses are banned in Indonesia.
